Professional Summary

Full Stack Developer with 3 years of experience building production-grade mobile and web applications. Experienced in React Native, React.js, Node.js, Express.js, MongoDB, Flutter and REST APIs. Skilled in real-time systems using Socket.IO, GPS tracking, Bluetooth BLE integration, Firebase, and Google Maps APIs. Currently pursuing an MCA specializing in Artificial Intelligence while expanding expertise in scalable full-stack architecture and modern software engineering.

Technical Skills

- Frontend & Mobile: React.js, React Native, Flutter, JavaScript (ES6+), HTML5, CSS3
- Backend: Node.js, Express.js, REST APIs, Socket.IO, JWT Authentication
- Databases: MongoDB, MySQL, Firebase
- Tools: Git, GitHub, VS Code, Android Studio, Postman
- Technologies: Google Maps API, BLE, GPS Tracking, Geofencing, Firebase Cloud Messaging

Professional Experience

App Developer — Innspark Solutions Pvt. Ltd. (Jun 2023 – Present)

- Developed and maintained production React Native and Flutter applications across healthcare, logistics, and consumer domains.
- Built a telemedicine platform with BLE-enabled medical device integration, real-time chat, and video consultation features.
- Engineered a parental control application with screen-time management, app restrictions, and device monitoring.
- Developed a live GPS vehicle tracking solution using Google Maps, geofencing, trip history, and real-time updates.
- Created an internal Bluetooth Debugger using react-native-ble-manager to simplify BLE testing and diagnostics.
- Integrated REST APIs, Firebase services, and real-time Socket.IO communication across multiple applications.
- Collaborated in Agile teams using Git/GitHub, code reviews, and sprint-based development.

Key Projects

FlowSync: Full-stack collaboration platform using React.js, Node.js, Express.js, MongoDB, JWT Authentication, Socket.IO, Kanban board, task management, and real-time chat.

GPS Vehicle Tracking System: Live GPS tracking, Google Maps integration, geofencing, trip history, and real-time vehicle monitoring.

Telemedicine Platform: Doctor-patient communication with BLE medical device integration, real-time chat, and video consultation.

Parental Control Application: Device monitoring, screen-time management, app blocking, and secure pairing.

Bluetooth Debugger: BLE scanning, connection, read/write characteristics, and diagnostics tool.

Education

Master of Computer Applications (Artificial Intelligence) – Manipal University Jaipur (Pursuing)

Bachelor of Science in Computer Science – Mannam Memorial NSS College
